### *What you need to do:*

Effective collaboration gets twice the result with half the effort. In order to create a successful Bridge between us, we need the following minimum prerequisites:

- Documented project specification or the detailed requirement about what you want.
- Open communication through e-mail, chat or telephone.
- Your periodical feedback about our work.

### *What We Provide You:*

- At least 8 hours a day, 6 days a week of developing work.
- Hardware and software infrastructure.
- A favorable development environment. Guaranteeing timely communication and mutual collaboration.
- Project regular meeting, daily and weekly working report are available.
- Normative coding style.
- Complete and well documents written in English.
- Strict delivery time.

## Custom Software Development

As a leading service provider, Infinity is focused on offering top Class custom software development service at reasonable prices.

In the past three years, Infinity has completed over 100 software development projects, which brought us abundant development experiences. We have the expertise and strengths in the following fields:

- Software Analysis and Design
- Software Upgrade
- Software Testing
- Web Development
- Systems Programming
- E-Commerce Applications
- Database Tuning and Automated Maintenance

## Technology Consulting

Infinity has its advantageous access to a pool of highly qualified and skilled computer Professionals who can use English as their working language. Such asset is one of the keys to the Success of offshore Development. We are possessed of the consultants with abundant Experience on the industry of e-business, finance, manufacture and education. These experienced consultants are able to direct our technicians to make informed choices about the technical issues your company faces.

Infinity Technology International Ltd. can give you such service in a variety of different areas:

- Supporting and maintaining existing systems
- Supply-chain integration
- Architecting the system, including recommending specific technologies
- Transitioning to newer technologies
- Software project planning, management

## Software Development Methodology

Infinity has developed and implemented software development methodology integrating the philosophy behind CMM with our long-term project delivery methodology. A strong CMM discipline alone offers advantages with respect to quality. However, strict adherence To CMM without recognition of requirements for speed and agility can cripple the software Development effort from the start. Infinity's project life cycle can be grouped into four phases including: Project Startup, Business Prototype & Requirements, Analysis & Design, Implementation & Testing and Project Completion.

## How We Guarantee Successful Delivery

Infinity Technology International Ltd is focused on ensuring that all projects meet our customer's requirements and expectations. The following two aspects of our project methodology have been proved to guarantee the successful delivery in our decades of software development practice.

## Code Quality Assurance

We have a repeatable, effective software development process and a well-proven testing methodology based upon CMM level 3 ensures the high quality of code and successful delivery to our global clients.

Also we have a complete set of internal code review and functions walkthrough policy, which contains co-worker review, peer review, cross walkthrough, and group walkthrough to ensure the code quality.

## Schedule Assurance

To ensure projects are delivered on time we have developed a policy that is aimed to provide adequate visibility into actual progress and manage associated deviations from the schedules. Every week Infinity Technology International Ltd will release a project status report and a plan for the following week. This provides your project manager with a weekly control point for schedule management.

# Alliances & Partnerships

Infinity strongly believes in the power of relationships and

Infinity has partnership with major Bangladesh banks, Government agencies, private companies and numerous education institutions to achieve results in core business.
